## Subject Index of Volume 178

- Adsorption**  
 embedded droplet measurements and an adsorption model of the heterogeneous nucleation of solidification, 225
- Alloys**  
 chemical interdiffusion in amorphous early-late transition metal alloys, 65  
 evidence of fractals in the preliminary stages of amorphization by mechanical alloying, 29  
 heterogeneously nucleated  $\alpha$ -Al in amorphous aluminium alloys, 309  
 microstructure characteristics of rapidly solidified alloys, 129  
 microstructure selection in binary and ternary alloys, 199  
 prediction of solute trapping at high solidification rates using a diffuse interface phase-field theory of alloy solidification, 217  
 stability and transformation to crystalline phases of amorphous Zr-Al-Cu alloys with significant supercooled liquid region, 255  
 the undercooling and phase formation behaviour of melts of quasi-crystal-forming alloys, 293  
 thermodynamic properties of quasi-crystal-forming AlMn alloys from Knudsen cell mass spectrometric measurements, 89
- Aluminium**  
 heterogeneously nucleated  $\alpha$ -Al in amorphous aluminium alloys, 309  
 rapid solidification of undercooled nickel-aluminium melts, 305  
 stability and transformation to crystalline phases of amorphous Zr-Al-Cu alloys with significant supercooled liquid region, 255  
 thermodynamic properties of quasi-crystal-forming AlMn alloys from Knudsen cell mass spectrometric measurements, 89
- Amorphization**  
 evidence of fractals in the preliminary stages of amorphization by mechanical alloying, 29
- Arsenic**  
 thermodynamic and kinetic study of the ultrafast solidification of Si-As supersaturated solid solutions, 195
- Chromium**  
 nucleation and metastable phase formation in undercooled Fe-Cr-Ni melts, 163
- Containers**  
 containerless processing of undercooled melts: measurements of surface tension and viscosity, 73  
 development of containerless modulation calorimetry for specific heat measurements of undercooled melts, 61
- Cooling**  
 combined time-of-flight and mass spectroscopy for determination of the temperature of undercooled melts, 93  
 containerless processing of undercooled melts: measurements of surface tension and viscosity, 73  
 crystallization of highly undercooled metallic melts and metallic glasses around the glass transition temperature, 271  
 dendritic solidification of undercooled melts: mushy zone recalescence dynamics, 137
- development of containerless modulation calorimetry for specific heat measurements of undercooled melts, 61  
 measurements of dendrite growth velocities in undercooled pure Ni-melts—some new results, 159  
 nucleation and metastable phase formation in undercooled Fe-Cr-Ni melts, 163  
 nucleation reactions in undercooled liquids, 105  
 rapid solidification of undercooled nickel-aluminium melts, 305  
 slow dynamics in supercooled liquids: molecular dynamics simulations, 23  
 the undercooling and phase formation behaviour of melts of quasi-crystal-forming alloys, 293  
 thermodynamic properties of undercooled liquid metals: experiments and models, 51  
 thermodynamics of undercooled liquids and its application to amorphous phase formation, 55  
 undercooling of superalloy melts: basis of a new manufacturing technique for single-crystal turbine blades, 299
- Copper**  
 stability and transformation to crystalline phases of amorphous Zr-Al-Cu alloys with significant supercooled liquid region, 255
- Crystals**  
 crystallization of highly undercooled metallic melts and metallic glasses around the glass transition temperature, 271  
 mechanical instabilities in extended solid solutions near the crystal-to-glass transition, 245  
 stability and transformation to crystalline phases of amorphous Zr-Al-Cu alloys with significant supercooled liquid region, 255  
 the temperature dependence of the crystal-melt interfacial tension: a simple model, 15  
 the undercooling and phase formation behaviour of melts of quasi-crystal-forming alloys, 293  
 thermodynamic properties of quasi-crystal-forming AlMn alloys from Knudsen cell mass spectrometric measurements, 89  
 time-resolved X-ray diffraction studies of crystallization in metallic glasses, 265  
 undercooling of superalloy melts: basis of a new manufacturing technique for single-crystal turbine blades, 299
- Dendrites**  
 dendritic solidification of undercooled melts: mushy zone recalescence dynamics, 137  
 measurements of dendrite growth velocities in undercooled pure Ni-melts—some new results, 159  
 theory of dendritic growth in three dimensions, 147
- Diatomic clusters**  
 structure of diatomic clusters, 19
- Diffraction**  
 time-resolved X-ray diffraction studies of crystallization in metallic glasses, 265
- Diffusion**  
 chemical interdiffusion in amorphous early-late transition metal alloys, 65  
 nucleation theory for diffuse interfaces, 121

- Drop tubes**  
analysis of different nucleation behaviour of tantalum samples processed in the Grenoble high drop tube, 125  
nucleation and solidification studies using drop-tubes, 113
- Droplet measurements**  
embedded droplet measurements and an adsorption model of the heterogeneous nucleation of solidification, 225
- Electron beams**  
metastable phase solidification in electron beam welding of dissimilar stainless steels, 189
- Electronic properties**  
structural, electronic and magnetic properties of liquid, amorphous and quasicrystalline metals, 1
- Fibres**  
fine fibers by melt extraction, 239
- Fractals**  
evidence of fractals in the preliminary stages of amorphization by mechanical alloying, 29
- Glass**  
crystallization of highly undercooled metallic melts and metallic glasses around the glass transition temperature, 271  
icosahedral order in glass-forming metallic melts, 285  
mechanical instabilities in extended solid solutions near the crystal-to-glass transition, 245  
time-resolved X-ray diffraction studies of crystallization in metallic glasses, 265
- Growth patterns**  
eutectic and off-eutectic growth patterns, 233
- Growth velocities**  
measurements of dendrite growth velocities in undercooled pure Ni-melts—some new results, 159
- Interfaces**  
non-equilibrium interface kinetics during rapid solidification, 167  
nucleation theory for diffuse interfaces, 121  
prediction of solute trapping at high solidification rates using a diffuse interface phase-field theory of alloy solidification, 217  
the temperature dependence of the crystal-melt interfacial tension: a simple model, 15
- Iron**  
nucleation and metastable phase formation in undercooled Fe-Cr-Ni melts, 163
- Kinetics**  
non-equilibrium interface kinetics during rapid solidification, 167
- Lasers**  
pulsed laser quenching of metastable phases, 179  
rapid solidification in laser welding of stainless steels, 203
- Levitation**  
determination of thermophysical properties of liquid metals at high temperatures by levitation methods, 83
- Liquids**  
nucleation reactions in undercooled liquids, 105
- Magnetic properties**  
structural, electronic and magnetic properties of liquid, amorphous and quasicrystalline metals, 1
- Manganese**  
thermodynamic properties of quasi-crystal-forming AlMn alloys from Knudsen cell mass spectrometric measurements, 89
- Mass spectroscopy**  
combined time-of-flight and mass spectroscopy for determination of the temperature of undercooled melts, 93
- Melting**  
combined time-of-flight and mass spectroscopy for determination of the temperature of undercooled melts, 93  
containerless processing of undercooled melts: measurements of surface tension and viscosity, 73  
dendritic solidification of undercooled melts: mushy zone recalescence dynamics, 137  
development of containerless modulation calorimetry for specific heat measurements of undercooled melts, 61  
fine fibers by melt extraction, 239  
icosahedral order in glass-forming metallic melts, 285  
measurements of dendrite growth velocities in undercooled pure Ni-melts—some new results, 159  
measurements of thermophysical properties in high temperature melts, 77  
rapid solidification of undercooled nickel-aluminium melts, 305  
rapid surface melting, 185  
the undercooling and phase formation behaviour of melts of quasi-crystal-forming alloys, 293  
thermodynamics of undercooled melts and metastable phase formation, 43  
undercooling of superalloy melts: basis of a new manufacturing technique for single-crystal turbine blades, 299
- Metals**  
chemical interdiffusion in amorphous early-late transition metal alloys, 65  
crystallization of highly undercooled metallic melts and metallic glasses around the glass transition temperature, 271  
determination of thermophysical properties of liquid metals at high temperatures by levitation methods, 83  
icosahedral order in glass-forming metallic melts, 285  
liquid metal surface tension measurements: a kinetic-fluid dynamic model of surface oxygen availability, 99  
structural, electronic and magnetic properties of liquid, amorphous and quasicrystalline metals, 1  
structure of liquid metals determined by scattering techniques, 9  
thermodynamic properties of liquid metals, 35  
thermodynamic properties of undercooled liquid metals: experiments and models, 51  
time-resolved X-ray diffraction studies of crystallization in metallic glasses, 265
- Microstructures**  
selection of microstructures in rapid solidification processing, 171
- Mobility**  
a search for static structure changes in disordered systems in connection with atomic mobility changes, 279
- Mushy zones**  
dendritic solidification of undercooled melts: mushy zone recalescence dynamics, 137
- Nickel**  
measurements of dendrite growth velocities in undercooled pure Ni-melts—some new results, 159  
nucleation and metastable phase formation in undercooled Fe-Cr-Ni melts, 163

- rapid solidification of undercooled nickel-aluminium melts, 305
- Nucleation**
- a statistical approach to understanding nucleation phenomena, 209
  - analysis of different nucleation behaviour of tantalum samples processed in the Grenoble high drop tube, 125
  - embedded droplet measurements and an adsorption model of the heterogeneous nucleation of solidification, 225
  - heterogeneously nucleated  $\alpha$ -Al in amorphous aluminium alloys, 309
  - nucleation and metastable phase formation in undercooled Fe-Cr-Ni melts, 163
  - nucleation and solidification studies using drop-tubes, 113
  - nucleation reactions in undercooled liquids, 105
  - nucleation theory for diffuse interfaces, 121
- Ordering**
- a search for static structure changes in disordered systems in connection with atomic mobility changes, 279
- Oxygen**
- liquid metal surface tension measurements: a kinetic-fluid dynamic model of surface oxygen availability, 99
- Phase formation**
- metastable phase solidification in electron beam welding of dissimilar stainless steels, 189
  - nucleation and metastable phase formation in undercooled Fe-Cr-Ni melts, 163
  - prediction of solute trapping at high solidification rates using a diffuse interface phase-field theory of alloy solidification, 217
  - pulsed laser quenching of metastable phases, 179
  - stability and transformation to crystalline phases of amorphous Zr-Al-Cu alloys with significant supercooled liquid region, 255
  - the undercooling and phase formation behaviour of melts of quasi-crystal-forming alloys, 293
  - thermodynamics of undercooled liquids and its application to amorphous phase formation, 55
  - thermodynamics of undercooled melts and metastable phase formation, 43
- Quenching**
- pulsed laser quenching of metastable phases, 179
- Rapid solidification**
- dendritic solidification of undercooled melts: mushy zone recalescence dynamics, 137
  - embedded droplet measurements and an adsorption model of the heterogeneous nucleation of solidification, 225
  - metastable phase solidification in electron beam welding of dissimilar stainless steels, 189
  - microstructure characteristics of rapidly solidified alloys, 129
  - non-equilibrium interface kinetics during rapid solidification, 167
  - on the formation of the banded structure in rapid solidification, 153
  - prediction of solute trapping at high solidification rates using a diffuse interface phase-field theory of alloy solidification, 217
  - rapid solidification in laser welding of stainless steels, 203
  - rapid solidification of undercooling nickel-aluminium melts, 305
  - rapid surface melting, 185
  - selection of microstructures in rapid solidification processing, 171
  - thermodynamic and kinetic study of the ultrafast solidification of Si-As supersaturated solid solutions, 195
- Saturation**
- thermodynamic and kinetic study of the ultrafast solidification of Si-As supersaturated solid solutions, 195
- Scattering**
- structure of liquid metals determined by scattering techniques, 9
- Silicon**
- thermodynamic and kinetic study of the ultrafast solidification of Si-As supersaturated solid solutions, 195
- Solid solutions**
- mechanical instabilities in extended solid solutions near the crystal-to-glass transition, 245
- Solidification**
- nucleation and solidification studies using drop-tubes, 113
- Solute trapping**
- prediction of solute trapping at high solidification rates using a diffuse interface phase-field theory of alloy solidification, 217
- Steel**
- metastable phase solidification in electron beam welding of dissimilar stainless steels, 189
  - rapid solidification in laser welding of stainless steels, 203
- Structural properties**
- structural, electronic and magnetic properties of liquid, amorphous and quasicrystalline metals, 1
- Tantalum**
- analysis of different nucleation behaviour of tantalum samples processed in the Grenoble high drop tube, 125
- Tension**
- containerless processing of undercooled melts: measurements of surface tension and viscosity, 73
  - liquid metal surface tension measurements: a kinetic-fluid dynamic model of surface oxygen availability, 99
  - the temperature dependence of the crystal-melt interfacial tension: a simple model, 15
- Thermodynamics**
- dendritic solidification of undercooled melts: mushy zone recalescence dynamics, 137
  - determination of thermophysical properties of liquid metals at high temperatures by levitation methods, 83
  - measurements of thermophysical properties in high temperature melts, 77
  - slow dynamics in supercooled liquids: molecular dynamics simulations, 23
  - thermodynamic and kinetic study of the ultrafast solidification of Si-As supersaturated solid solutions, 195
  - thermodynamic properties of liquid metals, 35
  - thermodynamic properties of quasi-crystal-forming AlMn alloys from Knudsen cell mass spectrometric measurements, 89
  - thermodynamic properties of undercooled liquid metals: experiments and models, 51
  - thermodynamics of undercooled liquids and its application to amorphous phase formation, 55
  - thermodynamics of undercooled melts and metastable phase formation, 43
- Time of flight**
- combined time-of-flight and mass spectroscopy for determination of the temperature of undercooled melts, 93

**Turbines**

undercooling of superalloy melts: basis of a new manufacturing technique for single-crystal turbine blades, 299

**Viscosity**

containerless processing of undercooled melts: measurements of surface tension and viscosity, 73

**Welding**

metastable phase solidification in electron beam welding of dissimilar stainless steels, 189

rapid solidification in laser welding of stainless steels, 203

**Zirconium**

stability and transformation to crystalline phases of amorphous Zr-Al-Cu alloys with significant supercooled liquid region, 255
